

Dimation expands into “NEW” facility to further enhance its Production Capabilities

Shakopee, MN – June 26, 2019 – Dimation Inc., a privately held company, (www.dimation.com) and leading provider of electronic manufacturing services for various types of manufacturing technology industries and supply chain solutions for brand name OEMs in the industrial, medical and mil/aero, LED Lighting and IoT markets, announces its new manufacturing facility and there will be a Chamber of Commerce Ribbon Cutting Event on **September 26th, 11am – 12 noon**. The official grand opening date is being discussed and will be held at some point in October. Updates to follow.

“We are pleased to announce” the new facility will be nearly quadruple the size of its Burnsville location. The new facility is Located in Shakopee, Minnesota, and provides Full Production and box build capability, but it will enable Dimation to provide more expanded value-add manufacturing services such as High Mix Production assembly, complex box build & systems integration, conformal coat, selective robotic soldering, dual AOI inspection and SPI capabilities, direct fulfillment, repair and refurbishment services as well as engineering solutions such as failure analysis, DFM & DFT and functional test development.

The expansion comes as a result of Dimation’s business growth and the recent acquisition of assets and highly effective and experienced employee resources as well as increased demand for the company’s low- to mid-volume solution services in the industrial, commercial, medical, aerospace/defense, IoT and Led Lighting segments. The Dimation solution set also includes complete product commercialization services that span from initial product design through market commercialization. Includes various manufacturing and aftermarket services that current and new customers have found attractive and continues to fuel an increase in demand for the Dimation US based Company.

About Dimation

Dimation is a leading provider of Quick-Turn prototype, Low to Mid volume Production assembly of High-Mix assemblies, Design/Layout for the EMS industry as well as providing miniaturization thru its Microelectronics division called Die Level services. Dimation also assists companies within the Internet of Things (“IoT”) products/services. We assist our customers with their designs of which provide next-generation connected products which help to deploy and manage critical communications infrastructures in demanding environments with high levels of security and reliability. Founded in 2004 by Edward Knutson, Dimation continues to help provide a rapid solution for our customers, saving critical time to market with our exceptionally FAST Turn times and high quality support.
